

A man with a beard and safety glasses is using a STIHL hedge trimmer to trim a large green bush in a garden. He is wearing a grey long-sleeved shirt and black gloves. In the background, there are various plants, including purple flowers and a house with windows. In the foreground, there is a green wheelbarrow containing a chainsaw, a trimmer head, and a helmet.

 <b>36GBM</b>	40CM/16" INC SPROCKET	3213 000 0064	20	1	\$766.00

**NOTE:** GBM - good for harsh and abrasive environments - has a tooth on every link - more expensive - not good for use in soft conditions as rivets will wear out before teeth - not economically viable in these conditions.

**GBM good for:** Concrete - reinforced concrete - bricks in general - masonry - stoneware pipes - abrasive rock\* such as asphalt and building blocks (sandstone) - hard rock, granite\*

**GBE - Better for use in soft conditions** - is a skip chain design to keep cost lower, with less teeth they will wear at same rate as tie straps and rivets - cheaper to buy. GBE is particularly suitable for cutting the following material:  
 - Abrasive stone, e. g. asphalt and bricks (sandstone) Moreover, the following materials can also be cut:  
 - Concrete - Reinforced concrete - General blocks
