 <p>36GBM</p>	40CM/16" INC SPROCKET	3213 000 0064	20	1	\$766.00

NOTE: GBM - good for harsh and abrasive environments - has a tooth on every link - not good for use in soft conditions as rivets will wear out before teeth - not economically viable in these conditions.

GBM good for: Concrete - reinforced concrete - bricks in general - masonry - stoneware pipes - abrasive rock* such as asphalt and building blocks (sandstone) - hard rock, granite*

GBE - Better for use in soft conditions - is a skip chain design to keep cost lower, with less teeth they will wear at same rate as tie straps and rivets. GBE is particularly suitable for cutting the following material:
 - Abrasive stone, e. g. asphalt and bricks (sandstone) Moreover, the following materials can also be cut:
 - Concrete - Reinforced concrete - General blocks

*Reductions in performance and service life possible
